## Clear space

To ensure that the University logo always appears clearly and unobstructed, it is important to provide an area of clear space around it. The minimum clear space areas are shown here. No other object should appear within this area at any time, and where possible, this clear space should be increased. The logo should maintain a clear space equal to  $0.5x$  (half the size of the tower symbol) around the whole logo.

**UNIVERSITY OF LEEDS**

## Digital

When used digitally, you can use the standard University logo or if it appears less than 138px wide you can use the pixel logo, which has been adapted for legibility at a smaller size on screen. Neither the standard logo or the pixel logo should be displayed any smaller than 100px wide.
